Our plants are grown from originators' seed only. 1,000 for \$4.50; 2,000, \$7.50.

BEEFSTEAK

GIANT EVERBEARING—A beautiful red, wonderful yielder; ripe fruit from early summer until killed by frost; medium size; for a continuous crop, this one is hard to beat. Try it and be convinced.

PERFECTION—A standard early red variety. As now grown it is very similar to Chalk's Jewel. The fruit ripens early and bears until frost.

DWARF CHAMPION, OR TREE TOMATO—The most popular of the dwarf variety in cultivation. Sturdy, stocky plants, are of upright growth, need no support. Produces handsome purplish red fruits that begin to ripen early and are produced throughout the season.

MATCHLESS—A very dependable, large and smooth tomato, second early sort, makes a good canning variety; color, cardinal red.

KING OF THE EARLIES—A new tomato. This tomato is claimed to be the earliest, the smoothest early tomato in the world—a tomato above all others. The plant is a mass of beautiful red fruit. If you want early tomatoes, don't miss this one.

RED ROCK—One among the best. Its size, beauty, shape, color, flavor, durability and productiveness makes it desirable to growers. Similar to Stone.

SNOWBALL—A novelty in tomatoes; color pearly white; firm and solid; early to late; fine for table, pickling or canning.

"FIRST OF ALL"—The originators claim this to be the earliest, largest, smoothest, finest flavored, extra early tomato in cultivation. The color is rich cardinal red; tough skin, making a good shipper, fine for market or table. Don't fail to try it.

NORTON (WILT RESISTANT)—This variety was selected from the famous Stone, producing a heavy yield of large, smooth, solid, red fruit which ripens medium early. It is somewhat larger than the Stone, and is highly recommended because of its wilt-resisting features. The havoc wrought by wilt in Tomatoes is serious, and if you have been disappointed in growing tomatoes because of this disease, you will be interested in this hardy, wilt-resistant sort.

JOHN BAER—Early, smooth, bright scarlet; has short, vigorous vines; has less seeds than Earliana and a little later.

MOORE'S OLD DUKE OF YORK—Claimed by the Originators to be Blight-Proof—This is a new one on me, but Mr. Moore, the originator, made such great claims that we wanted to try it. It matters not where you get your plants or seed this will be a good rule.
